

TRAFFIC AND PARKING CONTROLS

Although District grounds are public property, the Board has the responsibility for protecting District property and for assuring the safety of all persons on the grounds. Therefore, the Board directs the Superintendent/designee to set up controls related to driving and parking on District property, as well as the use of District grounds and facilities by the public.

Parking is prohibited on school property without the appropriate parking sticker for any purpose other than for attendance at school activities or for employees while performing their assigned duties. Parking space is limited; therefore, rules are promulgated to permit maximum utilization of space and safe traffic flow and provide for appropriate fire lanes. Parking areas will be designated and maintained for handicapped persons as mandated by law.

Appropriate signs for accommodating the flow of traffic on school roadways are placed to facilitate traffic flow around buildings. “ No Overnight or Unauthorized Parking” signs may be placed at various building parking areas for security and safety reasons.

Licensed vehicles with the exception of District and police vehicles may be operated only on areas designated for traffic and parking. A maximum speed of 15 miles per hour, unless posted otherwise, will be observed at all times.
