

INTEGRATED PEST MANAGEMENT
(Use of Pesticides)

The following guidelines are used by District staff and contractors when pesticides or alternative pest-control products are used.

Pesticide Use When School Is Not in Session

Pesticides will be applied on or in classroom buildings only if they are applied for the longer of four hours or the minimum time specified on the pesticide's label:

1. prior to the beginning of the school day;
2. after the school day has concluded or
3. when school is not in session under the school calendar established by the Board.

Pesticide Use When School Is in Session

Pesticides will only be applied on or in classroom buildings when school is in session provided that:

1. persons other than the applicator and necessary school staff are not scheduled to be in the treatment area during treatment, and for the longer of four hours or the minimum time specified on the pesticide's label, as measured from the time the pesticide application is complete and
2. the entrance to the area where the pesticide is applied is posted with a sign including the following:
 - A. the sign shall measure at least 8 1/2 inches by 11 inches and
 - B. the sign is printed with letters at least 1 inch in height stating: "Pesticide Treatment Area. Do not enter before (date and time when re-entry is permitted)."

Exempted Pesticides

The pesticide being used is one of the following and is applied in strict accordance with the label instructions:

1. manufactured paste or gel balls;

2. paraffin-based rodent control product placed in industry-identified, tamper-resistant bait stations;
3. termite baiting stations;
4. rodenticides placed in wall voids or other areas that are inaccessible to humans and domestic animals;
5. disinfectants, sanitizers, germicides and anti-microbial agents or
6. dusts used in unoccupied areas of the structure.

Pesticide Documentation

Except for the exempt pesticides, if one of the above conditions is met, the following information is provided to the school's contact person for pesticide applications as soon as practicable following the application:

1. date and time pesticide was applied;
2. treatment area;
3. target pests;
4. brand name and EPA registration number of pesticide applied and
5. if applied under the rules for application when school is in session, the time or conditions for re-entering the treatment area as specified by the label, if specified.

Prior Notification

The District will develop a plan where parents or guardians of minor students, adult students, faculty and staff who are enrolled or employed may request and receive prior notifications of scheduled service visits by businesses in which pesticides may be applied or scheduled pesticide applications by licensed school employees.

The District's plan for prior notification includes:

1. the method of notification as determined by the school, which may include but not be limited to email and listserv methods and

2. if special circumstances prevent prior notification, notification will be made as soon as possible and the notice shall explain the reasons why advance notice was not provided.

Exempt pesticides need not comply with the notice requirements.

District Contact, Records and Documentation

The District designates an employee as contact person for pesticide application. The District maintains records and documentation of pesticide applications for inspection during normal school hours.

1. Records provided to the designated contact person are maintained for one year after application.
2. Documentation that the requested notifications were made in compliance with the IPM plan is also maintained.
