

FACILITIES DEVELOPMENT GOALS

The educational program is influenced significantly by the environment within which it functions. The development of a quality educational program and District facilities that help to implement it should be complementary.

It is this Board's goal to provide the facilities needed for the number of students in the District, to provide the kind of facilities which best support and accommodate the educational program and to develop a long-range planning and evaluation program.

The Board recognizes that capital outlay funds are limited and that it must establish priorities in order to make the best use of the school building funds. Whenever possible, the cultural as well as educational needs of the community are considered in planning facilities expansions.

Architects employed by the Board are expected to plan for simplicity of design, sound economics (including low, long-range maintenance costs), efficiency in energy consumption, low insurance rates and high educational utility and flexibility.
