

COCURRICULAR AND EXTRACURRICULAR ACTIVITIES

The purpose of education is to develop the whole person of the student. For this reason an educational program must embody, as an essential element, activities that involve students beyond the classroom and foster the values that result from interaction and united effort. Such activities form a logical extension of the required and general curriculum and the elective or special curriculum.

The Board has established the criteria for cocurricular and extracurricular activities consistent with its philosophy of, and goals for, education. All student activity programs must:

1. have educational value for students;
2. be in balance with other curricular offerings in the schools and be supportive of, and never in competition with, the academic program and
3. be managed in a professional manner.

The Board may require that students pay reasonable fees to participate in cocurricular and extracurricular activities.

The following guidelines govern the student activity programs.

1. Student activities are those school-sponsored activities that are voluntarily engaged in by students, have the approval of the school administration and do not carry credit toward promotion or graduation.
2. Each school, under the direction of the principal and professional staff, has a student activity program designed to stimulate student growth and development by supplementing and enriching the curricular activities. All receipts and expenditures are accounted for through the activity account.
3. Each activity should be designed to contribute directly to the educational, civic, social and ethical development of the students involved.
4. The student activity program receives the same attention in terms of philosophy, objectives, social setting, organization and evaluation as that given the regular school curriculum.
5. Each school develops written guidelines and procedures regulating the creation, organization, administration and dissolution of student activity programs. The Superintendent reports annually to the Board the general purposes, plans and financial status of the cocurricular and extracurricular programs of the District.

6. The expenses involved in participating in any school activity and in the total program for a school year should be set so that a majority of the students may participate without financial strain. Special consideration may be given in cases in which the expense of participating would result in exclusion.
7. Activities must be open to all students, regardless of race, color, national origin, ancestry, citizenship status, religion, sex, economic status, age, disability or military status.
8. Activities must not place undue burdens upon students, teachers or schools.
9. Activities should not interfere with regularly scheduled classes. This limitation often requires conducting such activities beyond the regular school day, if possible.
10. Activities at any level should be unique, not duplications of others already in operation.
11. Students participating in cocurricular and extracurricular activities are expected to demonstrate responsible behavior and good conduct. The Board encourages the development and promotion of sportsmanship in all phases of the educational process, including athletics and all other cocurricular and extracurricular activities.
12. Students suspended and expelled from school are banned from extracurricular activities. Students may also be suspended from extracurricular activities for violations of the student code of conduct or the code of conduct of the particular activity in which they participate. Students absent from school are not permitted to participate in extracurricular activities on that date.
13. Annually, the Board directs the Superintendent/designee to identify supplemental contract positions that supervise, direct or coach a student activity program that involves athletic, routine/regular physical activity or health and safety considerations. Upon the identification of the position, the individual must complete the requirements established by the Ohio Department of Education and State law.
14. Students may be expelled for up to one year for firearm-related or knife-related incidents occurring off school property while at an interscholastic competition, extracurricular event or other school-sponsored activity.
15. Students may be removed from extracurricular activities when their presence poses a continuing danger to persons or property or an ongoing threat of disruption. If a student is removed from extracurricular activities, such removal may include all extracurricular activities in which the student is involved.
16. Resident students enrolled in community schools are permitted to participate in the District's extracurricular activities, including interscholastic athletics at the school to which the student would be assigned. Students must be the appropriate age and grade level as determined by the Superintendent, and must fulfill the same academic, nonacademic and financial requirements as any other participant.

17. Resident students attending STEM and STEAM schools are permitted to participate in the District's extracurricular activities, including interscholastic athletics, at the school to which the student would be assigned if the nonpublic school the student is enrolled in does not offer the extracurricular activity. Students must be of the appropriate age and grade level as determined by the Superintendent and must fulfill the same academic, nonacademic and financial requirements as any other participant.
18. Resident students attending a nonpublic school are permitted to participate in the District's extracurricular activities, including interscholastic athletics, at the school to which the student would be assigned if the nonpublic school the student is enrolled in does not offer the extracurricular activity. Students must be of the appropriate age and grade level as determined by the Superintendent and must fulfill the same academic, nonacademic and financial requirements as any other participant.
19. Resident students receiving home schooling in accordance with State law are permitted to participate in the District's extracurricular activities, including interscholastic athletics, at the school to which the student would be assigned. Students must be of the appropriate age and grade level as determined by the Superintendent and must fulfill the same academic, nonacademic and financial requirements as any other participant.

A student attending a nonpublic, community, STEM or STEAM school who is not entitled to attend school in the District may be authorized by the Superintendent to participate in an extracurricular activity offered by a school of the District. The activity must be one the school the student is enrolled in does not offer and may not be interscholastic athletics or interscholastic contests or competitions in music, drama or forensics.

A student attending a nonpublic school located in the District who is not entitled to attend school in the District may be authorized by the Superintendent to participate in an extracurricular activity offered by a school of the District that is interscholastic athletics or interscholastic contests or competitions in music, drama or forensics when:

- 1) the activity is one the school the student is enrolled in does not offer;
- 2) the student is not participating in the activity in the student's district of residence;
- 3) the superintendent of the student's district of residence certifies the student has not participated in any extracurricular activity that is interscholastic athletics or interscholastic contests or competitions in music, drama or forensics in the district for that school year and
- 4) the superintendent and the superintendent of the student's district of residence mutually agree in writing to allow the student to participate in the activity.

A student receiving home instruction in accordance with State law who is not entitled to attend school in the District may be authorized by the Superintendent to participate in an extracurricular activity offered by a school of the District. The activity must be one that the district the student is entitled to attend does not offer.

NOTE: *Districts are required to allow resident students enrolled in community schools (House Bill (HB) 487 (2014)) and STEM schools to participate in the district's extracurricular activities.*

HB 59, effective September 29, 2013, requires districts to allow resident students who are receiving home instruction to participate in extracurricular activities at the school to which they would be assigned. Districts are also required to allow resident students attending a chartered or non-chartered nonpublic school to participate in extracurricular activities in the school to which the student would be assigned if the activity is one that the nonpublic school they are enrolled in does not offer. Students participating under these provisions must be of the appropriate grade and age level as determined by the superintendent and must meet the same academic, nonacademic and financial requirements as any other student. Districts are prohibited from imposing additional rules or fees on a student participating under these provisions that are not applied to other students participating in the same program.

Districts may allow nonpublic, community, and STEM school students who are not eligible to enroll in the district the opportunity to participate in an extracurricular activity operated by a school of the district if the activity is one the school the student is enrolled in does not offer, and the activity is not interscholastic athletics or interscholastic competitions in music, drama or forensics. The superintendent may also allow a homeschool student not eligible to enroll in the district to participate in an extracurricular activity offered by one of the schools if it is an activity the district in which they are eligible to enroll does not offer.

In 2009, the Ohio General Assembly enacted HB 1, which directed school districts to count – up to four days as excused absences – time that a student is absent from school for the sole purpose of traveling out of state to participate in a board-approved enrichment activity or an extracurricular activity. The student is required to make up all missed classroom assignments.

In addition, if the student will be out of the state for four or more consecutive school days for a board-approved enrichment or extracurricular activity, a classroom teacher employed by the board must accompany the student to provide instructional assistance.

For boards developing policy without the assistance of an OSBA consultant, this category is useful for general policy on student activities and for establishing definitions.
