

CLASS RANKINGS

The Board acknowledges the usefulness of a system of computing grade-point averages and class ranking for high school students, both to inform students of their relative academic placement among their peers and to provide students, prospective employers and institutions of higher learning with a predictive device so that each student is more likely to be placed in an environment conducive to success.

The Board authorizes a system of class ranking, by grade-point average, for students in grades 9-12, which shall be entered on his/her records, including transcripts.

The Superintendent/designee shall develop procedures for the computation of grade-point averages and the assignment of class rank to implement this policy.
