

SCHOOL ATTENDANCE AREAS

The Board determines attendance areas for the various schools of the District. The Superintendent recommends boundary lines, taking into consideration the best use of school facilities, the equalization of enrollments in classrooms, natural barriers and traffic hazards and patterns. Except as the foregoing factors influence boundary lines, the area established should permit each student to attend the school nearest his/her place of residence.

Students are expected to attend the schools in the areas in which they live; exceptions may be made within Board policy or may be made in the best interests of the student and/or the schools.
